

Marine Mammal Additional Sampling Protocols

After sampling of the catch according to Tables 1a-h and Table 3 is completed, additional marine mammal measurements (Bottlenose dolphins only) and sampling should occur as outlined in Table 4. Be sure to fill out separate tags for each sample collected (Figure 34).

The image shows two white Tyvek sample tags with red circular punch holes on the left. The top tag is filled out with handwritten information. The bottom tag is a template for sample type selection.

Figure 34. Properly filled out white Tyvek sample tag.
